

Change of CEO at ROBO•MAT AG

A new era begins for Robo-Mat AG on November 1, 2024. Raphael Huber will take over operational responsibility as CEO and will be introduced to his new tasks and areas of responsibility by the previous Managing Director Markus Zimmermann.

Raphael Huber has a basic technical education, a degree in engineering and further training in business administration. He has held various management positions at ABB and Hitachi Energy, where process automation was always at the center of his work. Markus Zimmermann will gradually withdraw from the operational business over the course of 2025 and will support Raphael Huber as Chairman of the Board of Directors in future.

The early handover of responsibility will secure the successful development of the company in the long term, preserve jobs and further strengthen continuity and the trust of customers and suppliers.

Raphael Huber is looking forward to meeting you in person soon and taking on challenges together. He will continue to cultivate business relationships, introduce new ideas and continuously improve our machines and services.

Markus Zimmermann would like to express his sincere thanks for the many years of exciting collaboration with you as a customer, supplier or other partner. He is pleased that the succession plan has created a solid foundation for the sustainable development of the company. He wishes the new CEO and the entire Robo-Mat team continued pleasure and success.

Kind regards

ROBO • MAT AG
